

Badlands District Fire School

Winner Fire Hall

September 24, 2016

1. Radio Communications & the Fire Service: 4 hour class, morning, no limit

A basic (NON-TECHNICAL firefighter point of view) overview of how radio systems operate and how it affects operations in the fire service. Local systems as well as state-wide area radio system will be covered. Will provide an overview of what the different channels and talk-groups are intended for as well as functions and operations of radio equipment. The class will conclude with a question and answer period and questions specific to your local area of operations will be addressed as best as possible.

Instructor: Rick Gustad, Platte Fire Department

2. TIM's – Traffic Incident Management Safety: 4 hour class, afternoon, no limit

This class will provide information from the National Traffic Safety Council and National Department of Transportation on recommended practices for emergency vehicle placement and rescue personnel safety while operating near moving motor vehicle traffic incidents.

Instructor: Jeff Siscoe, Martin Fire Department

3. Dealing with aircraft incidents in small towns or rural settings: All day class, no limit

Class will be how to deal with aircraft incidents of all types and sizes by small cities and rural departments that don't have ARFF. Morning session will be classroom discussion on aircraft types and familiarization, hazards associated with aircrafts, and strategies and tactic when dealing with aircraft emergencies. Afternoon session will be hands on where we will go to the airport and look over different planes and talk about different hazards associated with them as well as go over how to evacuate and remove patients from different types of aircraft. We will finish the day doing some agent application techniques and performing a small simulated drill.

Required: Any form of PPE for the afternoon session, to include some type of boot and helmet.

Instructor: Cory Hoffrogge, Pierre Fire Department

5. Firefighter Survival/RIT: all day class, limit 20

Students will be introduced to firefighter RIT(C) (Rapid Intervention Team/Crew) training, techniques for developing firefighter survival attitude, identify needed personal equipment, situation awareness, SCBA knowledge and techniques for use in on air emergencies.

This course is designed to give the firefighter the confidence to successfully deal with situations that may be encountered in a fire situation. Students will also gain information about air management.

Required: Full PPE and SCBA

Instructor: Mike Jones, Burke Fire Department

6. Grain Bin Rescue: All day Class

We will start the class in the morning with classroom safety considerations for the rescuer and the victim, from scene size up, what are the best options of removal. What care will our patient need. Some class scenario, and ropes and knots training. In the afternoon we will put our skills into practice.

Required: Helmet, Safety glasses, Gloves, and a mask.

Instructors: Brian Baldwin and Paul Schreck
