RT-130, ANNUAL FIRELINE SAFETY REFRESHER TRAINING – (4 hrs.) The four hour Annual Fireline Safety Refresher will provide up to date fireline safety information for firefighters holding Incident Command System qualifications requiring this training per PMS 310-1, Wildland Fire Qualification System Guide.

S-130, FIREFIGHTER TRAINING – (30-35 1/2 hrs.) This course is designed to provide entry level firefighters skills. A version of L-180, Human Factors on the Fireline, is included as part of this course.

S-190, INTRODUCTION TO WILDLAND FIRE BEHAVIOR – (6-8 hrs.) This course provides instruction in the primary factors affecting the start and spread of wildfire and recognition of potentially hazardous situations. It is designed to meet the fire behavior needs of a firefighter type 2 (FFT2) on an incident as outlined in PMS 310.1.

S-131, FIREFIGHTER TYPE 1, is a 12-hour course designed to meet the training needs of the Firefighter Type 1 (FFT1) and/or Incident Commander Type 5 (ICT5). This course is designed to be interactive in nature. It contains class discussion and several tactical decision games designed to facilitate learning the objectives. Topics include operational leadership, communications, LCES, and tactical decision-making.

S-211, PORTABLE PUMPS AND WATER USE – (16-20 hrs.) This course is designed to provide knowledge and skills to design, set-up, operate, troubleshoot, and shut down portable water delivery systems. The focus is on portable pumps; it does not address water delivery for engines. Topics covered include: portable water delivery systems; equipment; roles and responsibilities; and system design and hydraulics. There is also a field exercise where students will apply what they learned in the classroom.

S-215, FIRE OPERATIONS IN THE WILDLAND URBAN INTERFACE - (16-24 hrs.) This is an instructor-led course intended to be presented at the local level. Instructional units include firefighter safety in the interface, managing human factors in the interface, pre-incident planning, size up and initial strategy, structure triage, structure protection overview, tactics in the interface, tactical operations and resource use in the interface, action assessment, plan update, and after action review.

FI-110, WILDLAND FIRE OBSERVATIONS AND ORIGIN SCENE PROTECTION FOR FIRST RESPONDERS – (6 hrs.) The primary emphasis of this course is to teach sound wildland fire observations and origin scene protection practices that enable first responders to a wildland fire scene to perform proper origin scene protection procedures. The course is presented by short lectures, electronic presentations, exercises, and class discussion.

NIFC/NIRSC BASIC RADIO OPERATION TRAINING – (4 hrs.) This training relates to NIFC National Incident Radio Support Cache (NIRSC) radio equipment and systems. A system that is not a NIFC-NIRSC system may work differently. As the BK DPH and P-150 radios are the primary NIFC-NIRSC incident handheld radio, they will be featured throughout this training presentation. Please bring a Bendix King radio to class.

All wildland fire training presented at the Eastern South Dakota Wildland Fire Academy will meet the standards set forth by the National Wildfire Coordinating Group (NWCG.)

COURSE	3/1/2019	3/2/2019	3/3/2019	LOCATION
	Friday	Saturday	Sunday	
S-130/190	1800 - ?	0800 - 1700	0800 - 1700	Tea Fire Station
